The anastrozole used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,935,437. The capecitabine used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 5,472,949. The carboplatin used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 5,455,270. The Cisplatin used in the 10 therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,140,704. The cyclophoshpamide used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,537,883. 15 eflornithine (DFMO) used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,413,141. The docetaxel used in the therapeutic combinations of the present invention can be prepared in the manner set forth in 20 U.S. Patent No. 4,814,470. The doxorubicin used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 3,590,028. The etoposide used in the therapeutic combinations of the present invention can be prepared in 25 the manner set forth in U.S. Patent No. 4,564,675. The fluorouricil used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,336,381. The gemcitabine used in the therapeutic combinations of the present 30 invention can be prepared in the manner set forth in U.S. Patent No. 4,526,988. The goserelin used in the therapeutic combinations of the present invention can be

prepared in the manner set forth in U.S. Patent No. The irinotecan used in the therapeutic 4,100,274. combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,604,463. The ketoconazole used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,144,346. The letrozole used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,749,713. The leucovorin used in the therapeutic 10 combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,148,999. The levamisole used in the therapeutic combinations of the present invention can be prepared in the manner set forth in GB 11/20,406. The megestrol used in the 15 therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,696,949. The mitoxantrone used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,310,666. The 20 paclitaxel used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 5,641,803. The Retinoic acid used in the therapeutic combinations of the present invention can be prepared in the manner set forth in 25 U.S. Patent No. 4,843,096. The tamoxifen used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 4,418,068. The topotecan used in the therapeutic combinations of the present invention can be prepared in 30 the manner set forth in U.S. Patent No. 5,004,758.

present invention can be prepared in the manner set forth in EP 00/095,875. The vinorelbine used in the therapeutic combinations of the present invention can be prepared in the manner set forth in EP 00/010,458. The sulindac sulfone used in the therapeutic combinations of the present invention can be prepared in the manner set forth in U.S. Patent No. 5,858,694. The selenium (selenomethionine) used in the therapeutic combinations of the present invention can be prepared in the manner set forth in EP 08/04,927. The ursodeoxycholic acid used in the therapeutic combinations of the present invention can be prepared in the manner set forth in WO 97/34,608. Ursodeoxycholic acid can also be prepared according to the manner set forth in EP 05/99,282. Finally, ursodeoxycholic acid can be prepared according to the manner set forth in U.S. Patent No. 5,843,929.

Still more preferred antineoplastic agents include: anastrozole, calcium carbonate, capecitabine, carboplatin, cisplatin, Cell Pathways CP-461,

cyclophosphamide, docetaxel, doxorubicin, etoposide,
Exisulind®, fluorouracil (5-FU), fluoxymestrine,
gemcitabine, goserelin, irinotecan, ketoconazole,
letrozol, leucovorin, levamisole, megestrol,
mitoxantrone, paclitaxel, raloxifene, retinoic acid,
tamoxifen, thiotepa, topotecan, toremifene, vinorelbine,
vinblastine, vincristine, selenium (selenomethionine),
ursodeoxycholic acid, sulindac sulfone and eflornithine

The phrase "taxane" includes a family of diterpene

30 alkaloids all of which contain a particular eight (8)

member "taxane" ring structure. Taxanes such as

paclitaxel prevent the normal post division breakdown of
